

Board Mock Examination: Aldehydes, Ketones & Carboxylic Acids

Class 12 CBSE Mock Test Series (Max Marks: 70)

Chapter / Focus Area: Organic Chemistry - Carbonyl Compounds

Section A & B Questions

- Q1. How will you distinguish between Propanal and Propanone using a chemical test?
- Q2. Explain the mechanism of nucleophilic addition of HCN to ethanal.
- Q3. Give the chemical reactions for:
- (a) Wolff-Kishner reduction of Acetophenone
 - (b) Hell-Volhard-Zelinsky (HVZ) reaction of Propanoic acid
 - (c) Rosenmund reduction of Benzoyl chloride
-

Section C: Multi-Step Organic Synthesis

- Q4. Carry out the following conversions in not more than 2 steps:
- (i) Bromobenzene to 1-Phenylethanol
 - (ii) Benzaldehyde to 3-Phenylprop-2-en-1-al (Cinnamaldehyde)
-
